AirMed 1 Compact Air Purifier

Compact and Portable Air Cleaning Solutions

The **AirMed 1** air purifier is our smallest unit and is ideal for localized air cleaning in smaller spaces. It's one of the most powerful compact units available, with a granular activated carbon filter for chemicals and odors and a medical-grade HEPA filter for airborne particles like dust and allergens. Need more chemical and odor filtration? Try the **Air Med 3** with double the activated carbon.

Price: As Low As **\$600.00**

Special Features:

- This unit has a granular activated carbon filter which is unique in a compact air purifier. Most compact air purifiers only have a sprayed-on mesh carbon filter that saturates quickly.
- Medical-grade HEPA to remove 99.97% of airborne particles at 0.3 microns in size.
- Handle for portability.

Ideal for:

- Someone who requires serious air cleaning in a compact format
- Travel, RV, cottage
- Portability
- Small rooms and spaces

AirMed 3 Compact Air Purifier

The **AirMed 3** air purifier is our smallest unit packed with the most chemical and odor fighting filtration you can find in a compact air cleaner. It has double the filtration capacity of our AirMed 1 and a super HEPA filter for particles. It's ideal those who need more heavy-duty filtration in a portable format.

Tip: Add UV to kill viruses & bacteria

Price: As Low As **\$550.00**

Special Features:

- Larger activated carbon filter with granular carbon for better filtration of chemical and odors. Most compact air purifiers only have a sprayed-on mesh carbon filter that saturates quickly.
- Handle for portability

Ideal for:

- Someone who requires serious air cleaning in a compact format with an emphasis on chemicals and odors
- Travel, RV, cottage
- Portability
- Small rooms and spaces

AirMed Pro 5 Air Purifier

The **AllerAir AirMedic Pro 5 Air Purifier** removes a wide range of pollutants which contribute to poor indoor air quality. It features an activated carbon filter to remove chemicals, gases and odors and a Medical Grade True HEPA filter that removes 99.97% of airborne particles at 0.3 microns.

Recommended Air Purifier for Schools

Price: As Low As **\$800.00**

Special Features:

- 2.5" deep carbon filter
- Larger activated carbon filter than most home air purifiers
- Exec or Vocarb carbon blends
- Upgrade your unit to different filtration options at any time by ordering different filters (smoke, heavy-duty filtration etc.)
- UV light option for neutralizing airborne germs, larger viruses and mold spores
- Custom carbon blends available
- Wheels for easy placement

Ideal for:

- General air filtration
- Controlling allergy and asthma triggers
- Removing a wide range of common household pollutants
- Standard household chemicals and VOCs

Portable UV light Air Purifier

MagComb portable UV light air purifier is a portable unit that uses medical-grade UVC light and HEPA filters to remove the virus and related airborne pathogens which protect your family is safe.

MagComb's revolutionary design allows air to be exposed to UVC light maximally, the vertical chamber design decreased the airflow speed and increased disinfection time, which makes the disinfection ability 3 times. Third-party testing proved that the MagComb UV-C air sterilizer can effectively inactivate the bacteria and viruses. HEPA and UV-C light technology have been a trusted technology for air purification from hospitals to airports for decades. Recent UVC break-throughs in manufacturing have made it possible for high-quality UVC bulbs to enter the consumer market. MagComb's 2-Stage air purification rethinks the fundamentals by focusing on maximum UVC exposure time rather than just collecting pollution and maximizing air volume.

AIR & SURFACEPRO & PRO +

ActivePure® Technology is based on technology originally developed by NASA for use during space travel. Now, it can be used in your own home to reduce up to 99% of airborne and surface contaminants such as allergens and bacteria.

The Aerus Pure & Clean eliminated 99.96% of airborne SARS-CoV-2 virus within 3 minutes in testing done at FDA-compliant military lab.
